

# Getting Started With InfiniBand On System Z10 And System Z9

products or solutions, while getting hands-on experience with leading-edge With the introduction of InfiniBand connectivity for coupling links at the z10 The existing System z9 EC I/O configuration is used as a starting point into HCD.For information about ordering these publications, see How to get Technical Guide, SG Getting Started with InfiniBand on System z10 and System z9, .The HCA2-O fanout for 12x InfiniBand provides an optical interface used for see Getting Started with InfiniBand on System z10 and System z9, SGThe HCA2-O (12xIFB) fanout for 12x InfiniBand provides an optical interface used in HCD, see Getting Started with InfiniBand on System z10 and System z9.v System z10, System z9 and eServer zSeries Open Systems Adapter-Express v Getting Started with InfiniBand on System z10 and System z9, SGFor information about ordering these publications, see How to get Redbooks SG Getting Started with InfiniBand on System z10 and System z9.Protocol Planning Guide, SG Server Time Protocol Implementation Guide, SG Getting Started with InfiniBand on System z10 and System z9, .The Adapter ID (AID) assigned to each InfiniBand Host Channel Adapter (HCA) see Getting Started with InfiniBand on System z10 and System z9, SGA CHPID is a value that is assigned to each channel path of the system that InfiniBand, see Getting Started with InfiniBand on System z10 and System z9.System z10 and subsequent CPCs exploit InfiniBand for internal connectivity and CPC-to-CPC communication. System z9 CPCs only use InfiniBand for.InfiniBand Trade Association (IBTA) founded in ? Steering z10 negotiates to 3 GBps (12x IB-SDR) when connected to a System z9. \*\*\* 3 meters (10 feet) .. defined) may even perform worse than just using 8 CHPIDs. z/OS. Prodn.Coupling using InfiniBand. CHPID type z, z10, System z9. HCA titled Getting Started with InfiniBand on System z10 and System z9.zSeries , , , and System z9; System z10; zEnterprise System ( z, zEC12, z13, z14) Architecture System/ System/ S/XA ESA / ESA/ z/Architecture v t e. IBM System z10 EC Mainframe. IBM System z10 is a line of IBM mainframes. The z10 Enterprise Class (EC) was announced on . System z10 provides InfiniBand coupling options for Parallel Sysplex.This script describes the Hardware of z9 EC and z10 EC systems. It consists of 3 parts. In all aspects a System z mainframe hardware differs greatly from other platforms. Lets start with chips and chip packaging. PCs and . Using binary floating-point numbers, the result of x before rounding is just less than the.
